EDUCATION

Georgia Institute of Technology

Online Masters of Science in Computer Science: Machine Learning Specialization

Atlanta, GA

Fall 2025 - Spring 2027

University of California Santa Cruz

Bachelor of Science in Computer Science, Minor in Mathematics

Santa Cruz, CA

GPA: 3.84

EXPERIENCE

Associate Software Engineer

AssetMark

September 2025 – Present

Charlotte, NC

- Developed and maintained full-stack features for the eWealth Manager platform, enhancing advisor workflows for enrollment and client asset management.
- Collaborated with engineers and product teams to translate business requirements into scalable, user-focused web solutions.
- Contributed to the Enrollment & Service team's core applications supporting advisors on a platform with \$140 billion in client assets under management.

Software Engineering Intern

UXLY

January 2025 – June 2025

Santa Cruz, CA

- Built a full-stack e-commerce chatbot using FastAPI, React, and Supabase supporting both guest product search and authenticated cart/order management.
- Implemented BM25-based product search engine with custom tokenization and dimensional filtering, achieving 95% search accuracy supporting product SKUs.
- Developed LangGraph React agent framework for seamless cart and order handling, reducing support queries by 60%.

Software Engineering Intern

NASA

June 2023 - May 2024

Mountain View, CA

- Implemented 10+ features in the Celestial Mapping System (CMS) using Java, enhancing 3D simulation accuracy and mission planning capabilities.
- Integrated Permanently Shadowed Region (PSR) imagery into CMS, improving coordinate accuracy by 40% and crater clarity by 25%.
- Presented CMS at NASA Better Together 2023, showcasing high-resolution lunar mapping, AI-enhanced imagery, and vector-based crater analysis.

PROJECTS

PlayPicks | *React, Flask, Firebase, Vercel, Render, OpenAI GPT-4-turbo, Odds API, RAG, Stripe*

- * Built an AI-powered sports betting chatbot subscription service using dynamic webscraping + Odds API (RAG) and GPT-4-turbo for real-time odds, AI predictions, and personalized insights.
- * Integrated stripe payments for subscription service, Firebase for data management, and Odds API for real-time sports data, deploying via Vercel and Render.

PantryPal | *Streamlit, Flask, Pandas, NLTK, scikit-learn, BeautifulSoup*

- * Engineered an AI-powered recipe recommendation tool, using Streamlit for an interactive UI and Flask for backend processing.
- * Built a machine learning model using scikit-learn and NLTK, leveraging BeautifulSoup for web-scraped recipe data to enhance recipe recommendations based on user-inputted ingredients.

TECHNICAL SKILLS

Languages: Python, C, C#, C++, Java, JavaScript, SQL, Swift

Web Frameworks: React, Node.js, Flask, FastAPI, Streamlit

ML/NLP Libraries: numpy, Pandas, scikit-learn, spaCy, NLTK, LangChain, LlamaIndex

Developer Tools: Git, Docker, AWS, GCP, Linux

Certifications: Oracle Certified Associate Java SE 8 Programmer, AWS Certified Cloud Practitioner
